Multiplication Task

As a little activity, please complete the tarsia puzzle.

1. Cut out the triangles.
2. Match up the questions with the answer.
3. Create a large triangle like the example to the right.

Transition from 3 to 4

- In Year 4, we cover the full curriculum including all Foundation subjects (History, Geography, RE, PE, Science, Art and Design and Technology).

- We continue to recap prior knowledge through interactive starters and then build upon these foundations.

- We will continue to support the children and get them ready for later phase.

Our Teaching Philosophy

- Every child can succeed with the right support
- High expectations + warm relationships
- Mistakes = learning opportunities
- Growth mindset embedded in everything
- Creativity and independence encouraged daily

Classroom Culture and Behaviour

- Clear routines and expectations
- Respect, resilience and teamwork
- Positive reinforcement (praise, points, certificates)
- A classroom where children feel safe, valued, and heard

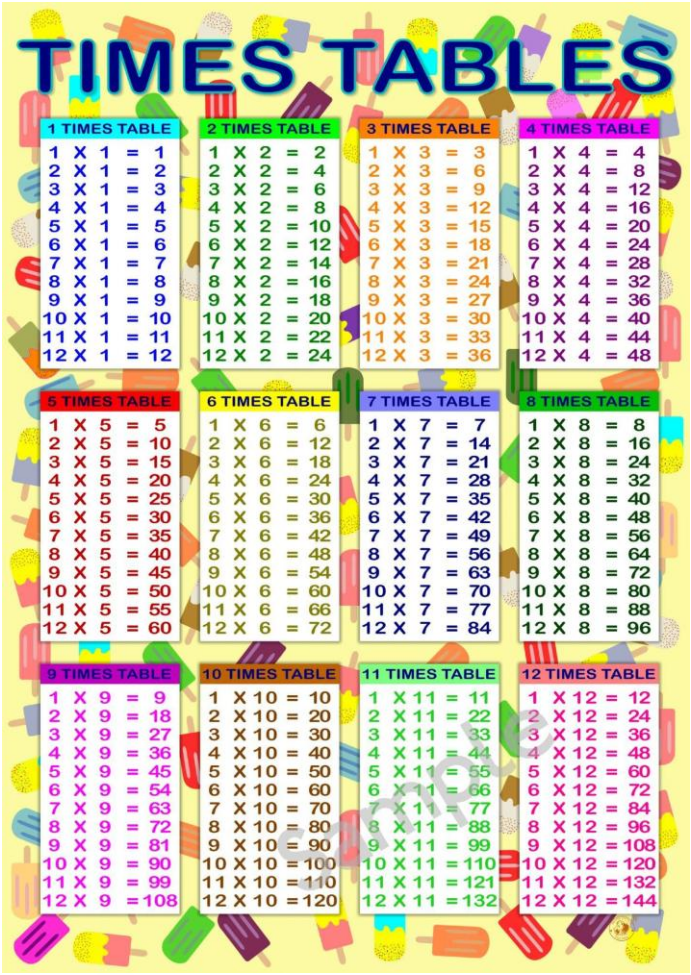

Times Tables

Times table knowledge is crucial for children's mathematical understanding.

We will be practicing times tables in class through oral repetition and written practice.

There is an expectation that all children must practice their multiplications at home to ensure that all children are confident.

Times-Table Testing

Towards the end of Year 4, all children across the country will take part in an online multiplication tables check.

The on-screen check will last no longer than five minutes. They will get 6 seconds per question to input their answers online. There will be 25 questions in total. Our aim is for all children to score 25 out of 25.

The national curriculum specifies that pupils should be taught to recall the multiplication tables up to and including 12x12 by the end of year 4.
